DETAILED ACTION

Examiner noticed that the connector in claims 1-4 and 7-12 does not have a Y shape as shown in the drawings. Based on the shape differences between the claims of record, the following restriction is presented by the examiner.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 7-12, drawn to a valved connector, classified in class 604, subclass 30.
 - II. Claims 5-6 and 13-18, drawn to a y-shape connector, classified in class 604, subclass 284.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Y-shaped connector is not essential for group I above .
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3763

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Mendez whose telephone number is (703) 308-2221.

A handwritten signature in black ink, appearing to read 'Manuel Mendez', with a large, stylized initial 'M'.
